

How to Use Your AIM Membership

All AIM Home Automation Clients

Repair Visits:

Sometimes things happen, but don't worry we have you covered! An AIM Membership covers the labor cost for a team member to come out to make any repairs or replace damaged parts.

Warranty Visits:

We will assist in the process of submitting any warranty claims to manufacturers as well as complete the new part replacement.

For Parts- Under the circumstance, a part is not covered under warranty, part replacement costs are not covered by AIM Memberships.

PowerView & Lutron Clients

Reprogramming Appointments:

As the seasons change, so do your home's lighting, privacy, and insulation requirements. If you find yourself needing assistance adjusting your PowerView® settings or changing your preferences, we can take care of it during a PowerView® or Lutron reprogramming appointment.

Product Battery Replacements

We will supply newly charged batteries and schedule a time for an AIM member to change them out.

Membership Expiration

The best part about your AIM Membership! If you do not end up using the full value of your membership, we will apply the difference as a credit to your next project with us.
